

Lovo 80 _

FOR THE GLOBAL TRACK

LOVO 80

THE LOVO 80 SPOTLIGHT IS A SLEEK LIGHTING SOLUTION THAT CAN ADD A TOUCH OF ELEGANCE TO YOUR SPACE. ITS ELEGANT DESIGN HIGHLIGHTS THE CHARACTER OF THE INTERIOR.

Our product is a perfect blend of style, functionality, and sustainable development. It is available in standard RAL colors or can be custom ordered from a wide range of Spectra's palette. This spotlight has a more delicate appearance compared to our other track products, making it a perfect fit for environments like shops or galleries, adding a touch of subtle charm and elegance. It is more than just lighting; it's a **way to enhance the image of a store and positively impact customer experience and sales efficiency.**

Our products offer versatility and cater to individual customer preferences. This luminaire symbolizes a **commitment to ecology and aesthetics**, operating in line with the **highest standards**, ensuring reliability

and user satisfaction. We use **high-quality materials and the latest technologies** to ensure efficient lighting and guarantee **long-lasting and reliable performance.**

Our lighting offers various color temperatures, allowing customers to adjust the light to specific needs and room atmospheres. From warm, muted shades to more modern, cool lighting, this luminaire **highlights aesthetic qualities and directs customers' attention to specific products.**

The lighting in clothing stores plays a significant role in enhancing the presentation of products. We have designed the LOVO 80 lighting system to be **functional and adaptable to various spaces**. It has a slimmer and more delicate appearance that harmonizes perfectly with the store's decor, adding elegance to it. As a result, it not only efficiently illuminates the displayed products but also serves as a stylish interior decoration that emphasizes its aesthetics.

The Lovo 80 lighting system features advanced technology that allows for **the creation of natural light**, enabling customers to accurately assess the appearance of clothing even in fitting rooms.

We create in the spirit of ECO

LOVO 80 is a design exclusively created by us and manufactured in Poland. By doing so, we are able to decrease the CO₂ emissions associated with transportation. Additionally, we use LED technology in our design which results in lower energy consumption, actively engaging in environmental protection.

„In the year 2022, we have opened 395 new salons under our brand, and all of them have been equipped with LED lighting. This not only consumes **40% less electricity** but also **generates less heat**, which in turn helps us to **reduce the electricity consumption** by air conditioning.”
